JAYASHREE JOHNSON (She/Her)

New York, NY | jayjohnsonofficial@outlook.com | 201-736-4914 | LinkedIn | GitHub

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems — New York, NY
Master of Science (MS) in Data Science| Concentration: ML & AI | **GPA**: 3.74 — May 2026

Justice Basheer Ahmed Sayeed College for Women — Chennai, India
Bachelor of Science (BS) in Advanced Zoology & Biotechnology | **GPA:** 8.1/10 — May 2024

RELEVANT COURSEWORK

Python Programming | Mathematical Foundation of Analytics | DBMS | Intro to Data Science | Scalable Databases | ML | Data Mining | Data Algorithms | Capstone Analytics | Biostatistics | Bioinformatics | AI in Biotech

TECHNICAL SKILLS

Languages: Python, SQL
ML & Analytics: Pandas, NumPy, Scikit-Learn, Statsmodels, XGBoost, Feature Engineering, Classification, Clustering, Model Evaluation
Systems & Tools: FastAPI, REST APIs, Git/GitHub, AWS (EC2, EMR), Hive, HDFS, Excel, Dashboarding, KPI Design, Cursor
LLM & AI Workflows: Claude, Gemini, AG2, Multi-Agent Systems, Prompt Engineering
Data & Visualization: Data Pipelines, Matplotlib, Plotly, Seaborn
Applied Areas: NLP, Trend Analysis, Behavioral Analytics, Product Analytics, Computer Vision

PROFESSIONAL EXPERIENCE

Imera — New York, NY
Campus Ambassador | Data & Operations Intern — Aug 2025 - Dec 2025
- Structured and normalized 100+ onboarding records to improve acquisition tracking and operational visibility.
- Created KPI reporting workflows across 3+ campaigns to monitor conversion, engagement, and onboarding retention.
- Drove 3x engagement lift across 50+ outreach interactions by optimizing communication tracking workflows.
- Managed live operational workflows across 2+ startup events, including QR validation, registration handling, & onboarding support.

HeteroGene — Chennai, India
Research Intern — Jan 2024 – Apr 2024
- Designed 2 PCR primers for DNA-based sex identification across 12+ biological samples using NCBI and UniProt.
- Validated 800+ base-pair sequences using BLAST and UniProt to improve downstream classification accuracy.
- Documented experimental workflows and analysis findings across 3+ research reports for reproducibility and QA tracking.

Bversity — Chennai, India
Bioinformatics Intern — Sep 2023 – Oct 2023
- Analyzed multi-species NRP-1 sequences to identify ~82% conserved regions linked to SARS-CoV-2 interactions.
- Constructed phylogenetic and homology-based structural models with >90% sequence identity for comparative analysis.
- Evaluated protein docking interactions to identify 3 potential high-affinity binding regions for target assessment.

SELECTED PROJECTS

FounderFit - Multi-Agent Founder Intelligence Platform | Hackathon Project — May 2026
- Launched an AI-native founder compatibility platform during a 5-hour NYC hackathon using AG2, Second Axis, Claude, Cursor, and Gemini workflows.
- Integrated onboarding pipelines analyzing GitHub, LinkedIn, resume, communication, and execution-style inputs across 10+ founder compatibility dimensions.
- Coordinated 6+ workflows for GTM strategy, repo storytelling, behavioral synthesis, sprint alignment, and startup execution analysis.

Eidon AI – ML Research Intelligence Platform — Jan 2026 – May 2026
- Built an end-to-end NLP research intelligence system on ~36K arXiv papers across CS domains for classification & evaluation.
- Engineered multi-label TF-IDF + Logistic Regression pipelines achieving Macro-F1 ≈ 0.66 on sparse high-dimensional scientific text.
- Examined 25 years of publication metadata to identify high-growth domains, interdisciplinary overlap, & emerging research areas.
- Developed FastAPI-powered real-time advisory workflows supporting 20-domain prediction, semantic retrieval, & comparison.

Multimodal Deep Learning-Early Stress Detection | SARD '25 Conference — Sep 2025 – Dec 2025
- Processed 1,400+ samples from the RAVDESS dataset, extracting MFCC audio features & facial frame sequences for modeling.
- Architected CNN (audio) and CNN-LSTM (video) pipelines, with video models achieving 72% higher accuracy than audio-only.
- Optimized temporal feature modeling over 100K+ frames, improving stress classification consistency for business reporting.
