

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems Master of Science (MS) in Data Science Concentration: ML & AI GPA: 3.74 Magna Cum Laude	New York, NY May 2026
Justice Basheer Ahmed Sayeed College for Women Bachelor of Science (BS) in Advanced Zoology & Biotechnology GPA: 8.1/10	Chennai, India May 2024

RELEVANT COURSEWORK

Python Programming | Mathematical Foundation of Analytics | DBMS | Intro to Data Science | Scalable Databases | ML | Data Mining | Data Algorithms | Analytics Capstone Project | AI in Biotech

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, HTML/CSS
LLM & AI Workflows: OpenAI API, Claude, Gemini, AG2, Function Calling, Multi-Agent Systems, Prompt Engineering, Pinecone, Semantic Retrieval
Systems & Development: FastAPI, Next.js, REST APIs, WebSockets, ClickHouse, Git/GitHub, AWS (EC2, EMR), KPI Design, Cursor, Datadog
Analytics & ML: Pandas, NumPy, Scikit-Learn, Statsmodels, XGBoost, Feature Engineering, Classification, Clustering, Model Evaluation
Data & Visualization: Data Pipelines, Matplotlib, Plotly, Seaborn
Applied Areas: NLP, Product Analytics, Trend Analysis, Behavioral Analytics, Computer Vision

PROFESSIONAL EXPERIENCE

Imera Campus Ambassador Data & Operations Intern	New York, NY Aug 2025 - Dec 2025
- Structured and normalized 100+ onboarding records to improve acquisition tracking and operational visibility. - Created KPI reporting workflows across 3+ campaigns to monitor conversion, engagement, and onboarding retention. - Drove 3x engagement lift across 50+ outreach interactions through workflow optimization and data-driven communication tracking. - Managed live operational workflows across 2+ startup events, including QR validation, registration handling, & user onboarding.	
HeteroGene Research Intern	Chennai, India Jan 2024 – Apr 2024
- Designed 2 PCR primers for DNA-based sex identification across 12+ biological samples using NCBI and UniProt. - Validated 800+ base-pair sequences using BLAST and UniProt to improve downstream classification accuracy. - Documented experimental workflows and analysis findings across 3+ research reports for reproducibility and QA tracking.	
Biversity Bioinformatics Intern	Chennai, India Sep 2023 – Oct 2023
- Analyzed multi-species NRP-1 sequences to identify ~82% conserved regions linked to SARS-CoV-2 interactions. - Constructed phylogenetic and homology-based structural models with >90% sequence identity for comparative analysis. - Evaluated protein docking interactions to identify 3 potential high-affinity binding regions for target assessment.	

SELECTED PROJECTS

DeadZone Agent Agent Engineering Hack NYC	May 2026
- Built an AI agent platform using FastAPI, Next.js, TypeScript, OpenAI function calling, ClickHouse, and WebSockets to generate offline continuity packs across 8 transportation routes. - Engineered multi-step AI workflows integrating LLM tool calling, caching, and agent payments, reducing retrieval time from 8s to 1s. - Implemented Datadog observability, multi-provider LLM failover, and circuit-breaker monitoring across 100+ deployments.	
FounderFit - Multi-Agent Founder Intelligence Platform Hackathon Project	May 2026
- Defined product requirements and launched an AI-native founder compatibility platform during a 6-hour NYC hackathon using AG2, Second Axis, Claude, Cursor, and Gemini workflows. - Integrated full-stack onboarding workflows analyzing GitHub, LinkedIn, and resume data across 10+ compatibility dimensions. - Orchestrated 6+ workflows for GTM strategy, repo storytelling, behavioral synthesis, sprint alignment, & startup execution analysis.	
Eidon AI - ML Research Intelligence Platform	Jan 2026 – May 2026
- Delivered an NLP research intelligence system analyzing 36K+ arXiv papers across 20+ domains for classification and trend analysis. - Trained TF-IDF and Logistic Regression pipelines supporting 20-domain research classification. - Examined 25+ years of publication metadata to identify emerging research trends and domain growth patterns. - Developed FastAPI workflows & a full-stack research dashboard integrating prediction services & semantic retrieval across 36K+ records.
